## PROJECTS

**World Cup 2026 Team Identity & Player Archetype Atlases — Independent research** *August 2026*

- Automated extraction in Python from semi-structured FIFA match-report PDFs for all 104 matches, preserving provenance spanning four linked team, player, passing-network and shot datasets.
- Designed interpretable team, outfield-player and goalkeeper models using rate normalization, feature engineering, clustering and cosine similarity, validated with leave-one-match-out and weighting-sensitivity analyses.
- Resolved a 21-role taxonomy with football domain knowledge where automated classification was ambiguous, then shipped interactive HTML/CSS/JavaScript atlases covering team tactical identities and player functions, communicating uncertainty and similarity to non-technical audiences.

**The Market for Peaches — Independent research** *July 2026*

- Analyzed the US labor market by age, skills, occupation and industry, framed on Akerlof's 'Market for Lemons' information-asymmetry model; developed a Python pipeline harmonizing BLS, CPS and O*NET data, applying Holm-Bonferroni corrections and Shapley decomposition across multiple regression specifications.
- Concluded that incumbent risk-aversion and small-firm hiring arbitrage point to a 2030s bidding war for scarce skills; launched an explorer joining BLS employment projections with AI-exposure scores and workforce age structure covering all detailed BLS occupations.

**Visible Value: Wage Determination in Major League Soccer — MSc Dissertation** *August 2025*

- Constructed a reproducible player-value pipeline and estimated club fixed-effects wage models with clustered, CR2 and minutes-weighted robustness checks; Shapley decomposition compared performance, popularity and roster-designation effects.
- Determined that roster designation dominated wage variation, with the clearest premiums on attacking and progressive play; released a simulator letting users reweight performance domains against 2025 salaries.

## EXPERIENCE

**Data Analyst — Sounds True, Denver, CO** *May 2023 – January 2024*

- Primary analytics point of contact across leadership, marketing, web and engineering, running ad hoc deep-dives beyond standing reports.
- Partnered with the CFO and CTO to define KPIs, build forecasts and evaluate campaigns, shaping budget allocation.
- Launched the company's first centralized KPI dashboard (Sisense), unifying revenue, ROI and engagement reporting; presented it org-wide.
- Restructured legacy databases into standardized, analysis-ready datasets with SQL data modeling, resolving data-quality issues and documenting workflows so other teams could self-serve.

**Professional Footballer — Club Tijuana (Liga MX), Police FC (BPL), Bangladesh National Team** *January 2022 – January 2023*

- Competed at first-division and international level across Mexico and Bangladesh, working with GPS-based tracking and performance-analysis systems used in professional evaluation.

**Research Analyst — ZS Wireless LLC, Princeton, NJ** *May 2020 – December 2021*

- Built market-sizing (TAM/SAM/SOM) and competitive-benchmarking analyses in wireless and satellite markets, including spectrum-licensing research across FCC filings and auctions.
- Conducted primary research through expert and vendor interviews, modeling technology-adoption curves for 5G and satellite broadband.
- Synthesized competitive intelligence into client-facing reports and forecasts.

**Financial Analyst (Summer) — Bloomberg LP, Princeton, NJ** *May 2019 – August 2019*

- Created best/base/worst-case scenario and forecasting models from Bloomberg Terminal data and ran budget-vs-actuals variance analysis.
- Delivered ad hoc analyses and a recurring reporting package, presenting findings to senior analysts and strategy leads.

## EDUCATION

**MSc Economics — University of St Andrews, Scotland** *September 2024 – December 2025*

**BA Mathematics & Data Science — Drew University, Madison, NJ** *September 2017 – May 2021*

## SKILLS

**Tools**: Python (pandas, scikit-learn) | R (fixest) | SQL | Snowflake | Stata | Excel | Sisense | Tableau | Power BI | Bloomberg Terminal | Git/GitHub | ETL & Data Pipelines

**Methods**: Data Science | Data Analysis | Statistical Programming | Econometrics | Causal Inference | Machine Learning | Panel Data & Regression | Clustering & PCA | Forecasting | AI Literacy | Market & Competitive Research | Football/Soccer Analytics

**Languages**: English | Bengali | Spanish

## VOLUNTEERING & ADDITIONAL

Disaster Relief (American Legion) | Community Initiatives (NJ Rise) | Academic Tutoring (NHS) | Youth Football Coaching (EWPAL) | Coauthor & Lobbyist (S. 3191 Civil Rights Cold Case Records Collection Act of 2018)
