PROJECTS

The Market for Peaches — Independent research *July 2026*

- End-to-end analysis of the US labor market across age, skills, occupation, and industry, framed on Akerlof's information-asymmetry model
- Built a Python statistical pipeline over BLS, CPS, and O*NET data: cleaned and merged 594 CPS occupation series and ran regressions across six specifications to test robustness
- Shipped an interactive occupation explorer covering all 832 detailed BLS occupations, joining AI-exposure scores (756 occupations) with CPS age structure (427 matched series)

Visible Value: Wage Determination in Major League Soccer — MSc Dissertation *August 2025*

- Built a data pipeline scraping, cleaning, and merging performance and salary data for 440 outfield players; estimated club fixed-effects wage regressions to identify what actually drives pay
- Found that attacking and progressive play command the largest wage premiums, while defensive contributions go unrewarded
- Shipped an interactive wage explorer letting users reweight the five composite performance domains against real 2025 salaries across all players

State of the Football '25 — Independent analysis *May 2026*

- Applied hierarchical clustering and PCA across 40 Premier League/La Liga clubs and 689 players; ran per-league and per-position regressions to test tactical drivers of dominance

EXPERIENCE

Data Analyst — Sounds True, Denver, CO *May 2023 – January 2024*

- Primary analytics resource; delivered data analysis, reporting, and research support to every team from leadership to marketing, web, and engineering
- Built and maintained first central KPI dashboard (Sisense) tracking ROI, engagement, and revenue; presented to the entire company
- Restructured legacy SQL databases into standardized, queryable datasets, improving reporting reliability and enabling self-serve analytics
- Partnered with CFO and CTO to define KPIs, evaluate campaigns, and support data-driven decision-making

Professional Footballer — Club Tijuana (Liga MX), Police FC (BPL), Bangladesh National Team *January 2022 – January 2023*

- Competed at first-division and international level across Mexico and Bangladesh; first-hand experience of how clubs evaluate performance and market value — the domain knowledge behind my wage-determination research

Research Analyst — ZS Wireless LLC, Princeton, NJ *May 2020 – December 2021*

- Quantitative and economic analysis of wireless and satellite communications markets, technology adoption, and competitive dynamics
- Produced client-facing reports and presentations translating technical findings into strategic recommendations
- Structured ambiguous technical and market questions into well-defined analytical problems

Financial Analyst (Summer) — Bloomberg LP, Princeton, NJ *May 2019 – August 2019*

- Analyzed operational and financial data to support planning and performance discussions
- Built scenario and forecasting models on Bloomberg Terminal; synthesized findings for senior analyst and strategy meetings

EDUCATION

MSc Economics — University of St Andrews, Scotland *September 2024 – December 2025*

BA Mathematics & Data Science — Drew University, Madison, NJ *September 2017 – May 2021*

SKILLS

Methods: Data Analysis | Quantitative & Economic Analysis | Machine Learning | Statistical Modeling | Causal Inference | Time Series Forecasting | A/B Testing & Experimentation | Panel Data | Regression | Stakeholder Management | Agile/Scrum

Tools: Python (pandas, scikit-learn) | R | SQL | Snowflake | STATA | Excel | Git/GitHub | API Integration | ETL & Data Pipelines | Tableau

Languages: English | Bengali | Spanish

VOLUNTEERING & ADDITIONAL

Disaster Relief (American Legion) | Community Initiatives (NJ Rise) | Academic Tutoring (NHS) | Youth Football Coaching (EWPAL) | Coauthor & Lobbyist (S. 3191 Civil Rights Cold Case Records Collection Act of 2018)
